

Ihar Manakhau

Frontend Developer | React, TypeScript, JavaScript |
Performance-driven UI & complex web applications

Personal info

Phone: + 375 44 477 27 92

E-mail: iharmanakhau@gmail.com

Telegram: [@Mr_IgorAleksandrovich](https://t.me/Mr_IgorAleksandrovich)

LinkedIn: linkedin.com/in/iharmanakhau

GitHub: github.com/mi8mto

Portfolio: <https://ihar-dev.vercel.app>

Frontend Developer with experience building scalable web applications using React and TypeScript. Experienced in building responsive applications, working with complex UI logic, and improving application performance. Actively leverage AI tools (ChatGPT, GitHub Copilot, Cursor, Antigravity) to accelerate development and improve code quality.

Skills

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

State & Data: Redux Toolkit, Zustand, TanStack Query, React Hook Form, Zod, dnd-kit

Styling & UI: Tailwind CSS, Styled Components, Responsive Design, Accessibility (a11y), Figma

Backend: Node.js, Express, REST API

Authentication: JWT, NextAuth

Databases: PostgreSQL, MongoDB, Prisma

Tools: Git, Docker, Vite, Webpack, ESLint, Prettier, GitHub Actions, Vercel

Testing: Jest, React Testing Library

Performance: Code Splitting, Lazy Loading, Bundle Optimization, Lighthouse, Core Web Vitals

AI Tools: ChatGPT, GitHub Copilot, Cursor, Antigravity

Animations: Framer Motion, GSAP

Professional Experience

2024-
Present

Frontend Developer (Freelance / Contract)

- Delivered responsive React applications for multiple client projects
- Built reusable component systems, reducing development time for new features by ~15%
- Integrated REST APIs and implemented JWT-based authentication flows
- Improved application performance (Lighthouse + Core Web Vitals), reducing load time by up to 20%
- Reduced bundle size through code splitting and dependency optimization
- Implemented forms using React Hook Form, decreasing validation errors and improving UX
- Developed backend services using Node.js and Express for fullstack features
- Containerized applications with Docker for consistent deployment environments
- Collaborated directly with clients to translate business requirements into technical solutions
- Leveraged AI tools (ChatGPT, Copilot, Cursor) to accelerate development and reduce repetitive tasks

2025-2026

Web Development Mentor (Part-time) - HTML Academy

- Review assignments and provide structured code reviews
- Conduct mentoring sessions (Q&A, debugging, layout workshops)
- Help improve code quality and eliminate common mistakes
- Reduce rework time by ~30% through clear feedback and guidance

2023-2024

Frontend Developer - WebCraft Studio

- Developed responsive interfaces using HTML5, CSS3, and JavaScript.
- Developed 10+ websites and credits using mockups (Figma/PSD) with cross-browser support.
- Implemented interactive interface logic in JavaScript (ES6+), including forms and dynamic elements.
- Optimized page performance to improve code structure and optimize resources.
- Supported various projects and contributed to backend API interfaces.

Projects

2026-
Present

Ebook Builder Platform - Document Editor (Notion-like)

- Built a Notion-like block-based editor from scratch using React, TypeScript, and Next.js
- Designed scalable block-based architecture with full CRUD operations
- Implemented custom pagination engine with automatic content flow between pages
- Developed undo/redo system using history state (past/present/future pattern)
- Built autosave system with localStorage and persistent state
- Implemented complex UI interactions: block editing, drag & reorder, selection system
- Added preview mode and print-ready PDF export

2025

NEXPO - Task Management Platform (Fullstack)

- Built a full-stack task management platform inspired by Kanban boards and Gantt charts
- Developed responsive dashboard with advanced task management features
- Implemented drag & drop interactions using dnd-kit
- Designed UI/UX structure and application layout
- Implemented authentication and authorization using NextAuth
- Built backend logic using Prisma ORM and PostgreSQL
- Added form validation and type safety using Zod
- Focused on reusable components and consistent UX
- Deployed and maintained the application on Vercel

2025

TechStore - E-commerce SPA

- Developed a Single Page Application (SPA) with authentication and responsive layout
- Implemented state management using React, TypeScript, and Redux
- Integrated REST API for user data and actions
- Configured project setup using Webpack and Docker
- Collaborated in Agile team using GitHub workflow and code reviews

Education

2012-2014 | Magister’s degree, Research engineer - National Aviation University

- Conducted advanced engineering research and worked with technical documentation
- Gained experience in analytics, project design, and mathematical modeling
- Developed strong structured problem-solving skills

2008-2012 | Bachelor’s Degree, Aerospace and Rocket Engineering - National Aviation University

- Acquired fundamental engineering knowledge in mathematics, physics, and technical systems
- Completed multiple team academic projects and defended a final thesis

Courses & Additional Training

2024-2025 | Frontend Development Program - Result University

- Developed a full-featured SPA with authentication, form validation, and responsive UI
- Built an application using React, TypeScript, Redux, and Webpack
- Integrated REST API with error handling and async state management
- Worked in a Scrum team: sprint planning, code reviews, GitHub workflow
- Built reusable components and improved application performance

2024 | Advanced Animations with CSS & JavaScript - HTML Academy

- Implemented complex UI animations using CSS and JavaScript
- Worked with transitions, keyframes, transforms, and timing functions
- Built interactive micro-interactions for user interfaces
- Ensured cross-browser compatibility and animation performance

2023 | Frontend Development Program - The Rolling Scopes School

- Completed intensive training with a team-based final project
- Developed solid understanding of JavaScript, semantic HTML, and responsive CSS
- Gained hands-on experience with Git: branching, pull requests, code reviews
- Collaborated in a distributed Agile team

Languages

English	B1 (Intermediate): reading technical documentation, written communication, team discussions
Russian	Native
Belarusian	Native
Ukrainian	Fluent (near-native proficiency)
